# Househam Field Master/Variable Rate Doc

Before starting please make sure you have the following:

### Househam Field Master

## 1 x USB Stick Named "Gate Keeper" or "Field Master"

Make sure the home screen has the GateKeeper symbol activated and that you have version V1.05 12M date 25<sup>th</sup> October 2012 installed or newer. You can find this by pressing the help button on the home screen.

Also check to see if the variable rate is activated on your box, you will see this under the symbol, and the words "variable rate" will be listed with others such as "boom control". (If variable rate is not activated, contract Househam Sprayers on 01400-276000 to arrange activation).

#### Field Master Module Required:

• Variable Rate Activation and Maintenance Module

#### Putting Variable Rate Data onto the Memory Stick

- Ensure that the memory stick has been cleared and that no old field data is stored on the drive.
- Make sure again that the stick is named either "Gate Keeper" or "Field Master".
- · Do not put the jobs into separate folders on the "Memory Stick".

# **Importing Variable Rate Files**

Fully load the Field Master Controller then install the USB Stick into the USB connection port. The USB pen drive must be named **GATEKEPER or FIELDMASTER**.

Once the Field Master Controller is fully loaded "Home Page" will appear as below.

Setting your Field Master controller up for variable rate.

Select the *select* on the home screen this will open the setup page below. This page will differ depending on your machine size for example this one is for a 24m machine.

Use the 主	key until you	u reach the	"Variable	Rate" page	as shown belo	W.

Select the *key*, this will open the "Variable rate settings" page as below.

Use the key to select the "Mode" you wish to use for this example "File Input".

Now select the plan you wish to use and press the "Apply" key Sto accept and load the plan.

Once the plan has been accepted the page will automatically close as below.

Wey will come highlighted and the plan selection

Select the will then allow you to test the plan and use the variable rate map. Then select the key which is under the key.

Use the "Test" Key to test the maps. To do this simply press on a part of the map, you will notice that first the requested figure will be given, then the applied figure will match in this mode.

Once happy deselect the "Test" mode by pressing the key again, and the requested and applied will return to 0.

Now to use the Variable Map Data select "VR" on the Househam TMC Controller to allow the variable rate data to be transferred from the Field Master Controller to the TMC Controller to change your rates automatically.

- Using a V2.0 TMC the variable rate key will look like depress the key until "VR" appears on the Key.
- Using a V3.0 TMC the variable rate key will look like "VR" appears on the Key.

### **Optional below**

Use the "Return to Home Screen" key then select either the Jobs from the "Planner List" or continue on to the "Drive Page" to start the Job.
